

Tazrout Dashboard — User Manual

Version 2.0 | Smart Irrigation Monitoring System

What is Tazrout?

Tazrout is a desktop application that lets you monitor and control your smart irrigation system in real time. It displays live sensor data from your agricultural zones, shows AI-generated irrigation decisions, and lets you manage system settings — all from one screen.

The app runs on your local computer and communicates directly with your field devices over your local network. No internet connection is required.

Getting Started

When you open the app, the **Home screen** loads automatically. The left sidebar shows the navigation menu. Click any item to switch screens. Click the menu icon (☰) at the top of the sidebar to collapse or expand it.

Screens

1. Home

The main dashboard. Shows a live overview of your entire system.

System Controls (top left)

- **REBOOT** — Restarts the backend system. A confirmation dialog appears before the action runs. The icon spins while the reboot is in progress.
- **SHUT DOWN** — Powers down the backend system. Also requires confirmation.

Welcome Card (top center)

- Shows system health status. When all zones are running normally you see a green check icon and "Welcome Back!" message.
- If a zone goes offline or a critical reading is detected, the icon changes to amber and the message updates.

Did You Know (top right)

- Displays a rotating agricultural fact. The highlighted percentage value is shown in green.

Performance Monitor (bottom left)

- Shows live sensor readings in four mini-charts:
 - **Water Output** — current water output percentage
 - **Soil Moisture** — soil moisture in g/m³
 - **Temperature** — current temperature in °C

- **Humidity** — humidity percentage
- Hover over any sub-card to highlight it.

Time Widget (bottom right, top)

- Live analogue clock with a digital readout below.

Calendar Widget (bottom right, bottom)

- Shows today's date.
-

2. Zones

Shows all your agricultural zones as cards in a 3-column grid.

Collapsed card — shows the zone name and a decorative symbol. Click **SHOW STATS** to expand.

Expanded card shows:

- **Device State** — ONLINE (green) or OFFLINE (red)
- **T : C°** — current temperature
- **M : g/m³** — soil moisture
- **Water : %** — water level
- **Valve State** — OPEN (blue droplet) or CLOSED (lock icon)
- Click **HIDE STATS** to collapse.

Online zones have a green top border. Offline zones have a red top border.

3. Analytics

Shows historical data and AI decisions.

AI Latest Decision — the most recent action taken by the AI engine.

Observation — something the AI detected in the sensor data.

Recommendation — a practical action suggested for the farmer.

Water Usage Chart — bar chart of water consumption. Toggle Day / Month / Year.

Decision Logs — table of all AI decisions. Filter by: All / Irrigation / Alerts / Advice.

Env Stats — line chart showing temperature (red) and humidity (blue) trends.

Resource Consumption by Zone — stacked bar chart per zone. Toggle Day / Week / Month.

4. Emergency Control

Use this screen to monitor device states and trigger an emergency stop.

Zone Status Grid — shows all zones with ONLINE (green dot) or OFFLINE (red dot) badges.

Emergency Stop Button

- Large red button at the bottom: **E M E R G E N C Y S T O P**
- A confirmation dialog appears before the stop signal is sent.
- **Only press this in case of a real emergency.**

The Emergency item in the sidebar shows a red dot when any zone is offline.

5. Settings

Display Settings

Setting	Options
Language	EN / FR / AR
Theme	Light / Dark
Font Size	Small / Medium / Large
Date Format	DD/MM/YYYY / MM/DD/YYYY / YYYY-MM-DD
Time Format	24H / 12H

System Settings

Setting	Options
Power Saving	Enabled / Disabled
Auto Sleep Timer	5 / 10 / 15 / 30 minutes / Never
UI Animations	Enabled / Disabled

Notification Settings

Setting	Options
Sound Alerts	Enabled / Disabled

- **Reset Default** — reverts all settings to factory defaults.
- **Apply Settings** — saves and applies all changes immediately.

6. Help Center

System Offline? — Check the gateway power and local network connection.

Erratic Readings? — Sensor calibration may be required. Inspect the affected zone.

Data Not Syncing? — Check your local network. Data updates once connection is restored.

Access Denied? — Contact your system administrator.

Get Support — Opens a contact card with a QR code, support website, and phone number. Click × or tap outside to close.

7. User Manual

Displays the documentation inside the app. Version and last-updated date are shown at the bottom.

Notifications

Notification cards slide in from the top-right of the screen.

- **Orange border** — sensor alert (zone offline or critical reading)
- **Blue border** — AI decision (irrigation triggered automatically)

Notifications dismiss automatically after 5 seconds. Click × to dismiss early.

Sleep Mode

If there is no mouse movement or touch input for the duration set in Settings > Auto Sleep Timer, the screen dims. Moving the mouse or touching the screen wakes it immediately.

Theme & Language

Go to **Settings** → **apply the change** → **Apply Settings**. Theme and language apply immediately when you press Apply.
